

Digital Notice Boards and Touchscreen Computer tables for nurseries & schools

Products and Services brochure

Products and Services

Welcome to Digital Nursery! We manufacture and install great looking and hugely beneficial IT equipment especially for the early years sector. We also offer unique online services, 360 degree support and special membership services, all of which adds up to an unprecedented and unique service.

We offer:-

- * Digital Notice Boards
- * Touchscreen Computer tables
- * Targeted and pre-approved software
- * Your own secure portal for storage and sending of children's work via Digital Nursery
- * Digital Club for extra support and exclusive offers

We have two specific products which work wonderfully independently of each other, but even better when they operate in tandem.

Digital Notice Boards

Digital Notice Boards are a fast, efficient and high impact way of relaying information and showing everyone the very best of your children and your nursery or school.

They are simple to use and show photographs, video, children's art work, Power point presentations and even video from your place of work or national TV. They make a real impact in reception and entrance areas, getting messages to parents through hugely useful ticker tape facility and showing them just how busy and interested they have been during the day

In summary the Digital Nursery Board can:-

- Display Children's art work
- Deliver messages and notices to parents and staff
- Play videos of activities
- Shows stills of the children at play or on trips & events
- Show live feeds of activities
- Play live TV

All of this can help to raise children's self-esteem, encourage participation, increase parental involvement, promote nursery activities and show your establishment at its very best!

The C-Point Touchscreen Play Table

Touchscreen Learning Table for nurseries and schools

Touchscreen technology allows children to learn through genuinely interacting with the applications by using the most natural way of showing or indicating; by pointing and using their fingers! Whether it is creating a picture, making decisions within a story, learning about shapes and colour...the options are endless.

The Digital Nursery C-Point is a robust and attractive touchscreen table which children, teachers and parents love to use and is available in a number of colours and sizes.

Paint

By far the most popular function has been the painting and picture program where children can draw their own pictures using pens, pencils, crayons, paints, sponges and so on, all through one touch of their finger and without any of the mess.

The pictures they make can be saved or printed for the children to take home or even sent directly to the Digital Notice Board where all the parents, teachers and other children can see it.

It can also be used to add to, enhance and manipulate existing photographs or even turn photographs into pastels, water colours or oil paintings.

Play

The table will come with interactive teacher/carer led games installed such as Made in Me and Mouse Music and there will be more to download directly from our website as we progress.

Updates

We will make new programs available as we develop them and these inexpensive and valuable additions to the table's capabilities will be able to be downloaded over the internet.

Safe

The table is waterproof, extremely robust and the screen is made of extra thick shatterproof material. Lockable wheels have been added for easy manoeuvring around the nursery but solidity when in use.

Simple

It is simple to use, with an easy to follow menu which allows the children to explore within the applications but to remain in a safe and secure and wholly appropriate learning and playing environment.

Targeted and pre-approved software

Our table comes pre-loaded with some great software and activities, and in order to keep it fresh, there is much more available from our website. We have our partner page where our friends in the software world, such as Mouse Club, Yellow Door and the Land of Me, who games and activities already appear on our table, have their other offerings, final chapters and so on, available to download.

Then there is our standard page where other providers place their games and activities.

But whoever the software provider is, it has all been pre-vetted by us and you can be sure it is suitable and appropriate for your nursery. Shown here are a few Examples of what we have to offer, for the full range, please visit the website!

THE DIGITAL NURSERY SYSTEM

Our products are great individually, but the real magic comes when you put them together;-

Digital Camera - Interactive Table - Digital Notice Board -
Printer - Digital Notice Board - Interactive Table - Digital
Camera - Printer - Digital Notice Board

Send pictures and work between the table and the screen; print, adapt and save images, send them to parents or use them to make presentations; the uses are limitless!

Testimonials - what our customers say

"We considered buying a TV and PC and linking them together, but this proved more difficult than we thought and didn't give the impact we wanted.

After some investigation I came across Digital Nursery and their friendly and professional approach, couple with the simplicity of the plug and play display made it an easy decision.

"We didn't have to think about buying the right bits and pieces as they did it all for us and we got it in a lovely bright colour which we were able to choose.

"The children love seeing their work on the big screen and its so easy to put it on that the older children often help do it and we can change it several times a day if we want."

Catherine, MD of Kiddies Corner, York

"As a children's day nursery we can highly recommend Digital Nursery as a company. The screen that we have purchased from them for our foyer, is eye catching and easy to use whilst still boasting clever technical features. The customer service we have had from 10squared has been excellent. Their technical support and sales team are friendly and always available to help. Parents who bring their children to our nursery have commented on how effective the screen is in getting across our messages to them and how much they love seeing photographs of their children having fun at nursery."

Karen Hazelden (proprietor) and Michelle Smith (manager)(Karen, Owner of Triangle House Day Nursery, Sowerby Bridge)

Digital Club

Supplying and installing our equipment is not where the story ends. You have already seen that we offer more software in order to keep your equipment up to date interesting and exciting; we also offer inclusive warranties to ensure your equipment is always working.

Now we have opened the Digital Club for our customers who wish to get the very best out of the equipment; Members of the club will enjoy;-

- **Special offers on additional software**
- **First releases and previews of new games and activities for the table**
- **Free advice/refreshers on using compatible software such as Power point and video for the screen**
- **Reduced prices on software downloads**
- **Free prize draw for best suggestions to enhance our products and offerings**

.....and all for just £2 per week!!
